CHARACTERISTICS OF TWO-DIMENSIONAL TRIANGULAR AND THREE-DIMENSIONAL FACE-CENTERED-CUBIC PHOTONIC CRYSTALS

Biblioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x11 mm. This item is printed on demand - Print on Demand Neuware - Photonic crystals (PhC's) are periodic structures of differing dielectrics that create a photonic band gap (PBG). A PBG, in turn, inhibits the propagation of electromagnetic waves of a specific frequency range. This thesis focuses on the fabrication and characterization of triangular-structured, two-dimensional PhC's with a PBG designed for visible wavelengths and with applications in visible integrated photonic systems. A...

Reviews

It is one of the most popular pdf. This really is for all those who state there had not been a really worth reading through. I am just delighted to inform you that here is the greatest pdf I have gone through within my individual daily life and can be the finest book for actually.

-- **Kristina Renner V**

A new eBook with a brand new point of view. It really is written in basic words and not confusing. I discovered this publication from my friend and dad recommended this book to find out.

-- **Miss Annamarie Ebert I**

This is actually the greatest publication I have gone through right up until now. I really could comprehend every little thing using this composed eBook. I realized this book from my friend and dad advised this eBook to learn.
