When you're working with preverbal children on the autism spectrum, you need a complete toolbox of highly effective strategies to expand their communication skills. Add Rapid Motor Imitation Antecedent Training (RMIA), and you'll have one of the most promising interventions for helping young children say their first words. Perfect to use in tandem with naturalistic interventions like Parent Responsiveness Training. Focused specifically on initial imitation of words—a critical step toward using language spontaneously. Quick and easy to implement. RMIA should be administered in short, frequent doses, making it an easy fit with your everyday practices. The only product available that shows SLPs and autism specialists how to conduct RMIA, this manual-and-CD set gives you everything you need for successful implementation. You'll get complete, practical guidance in the accessible how-to manual, and the CD-ROM gives you a full hour of explicit demonstration videos that show case studies of RMIA in action. You'll also get printable data collection forms to help organize RMIA sessions and...
