GLOBE MANUAL: FOR USE WITH STAND AND SUSPENSION GLOBES (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Globe Manual: For Use With Stand and Suspension Globes As this is an elementary work on the globe, no attempt is made at precise exactness in statement and definition: for example, the earth is regarded as a sphere; the celestial equator, a projection of the earth's equator outward against the starry dome; amplitude, latitude applied to the celestial sphere; date line, the 180th meridian; etc. 90 west means 90 west longitude; 40 north, 40 degrees north latitude. The sun is spoken of as moving, seeing the earth, etc. The earth is spoken of as moving in the direction of its noon-westward in its journey around the sun. Some problems and statements are true for the northern hemisphere only. A technical nomenclature is purposely avoided. The pamphlet is divided into Five Parts. The teacher may begin with any one and follow in any order. While it has been prepared for use with the suspended globe, the work may be used with any globe. It is an advantage for each pupil to have a small 25 or 50-cent globe. An attempt has been made to be rather comprehensive in topics but brief in treatment. Instead of giving the rules for the solution of problems, examples are given and processes described, leaving the teacher and pupils to make the rules. Some repetitions occur from the fact that the pamphlet is divided into five parts. The publishers will be glad to have any errors pointed out that they may be corrected in other editions. While this manual was written primarily to accompany the suspension or Hanging Globes, it is equally applicable to globes mounted on standards. About the...
