

ASME transactions Volume 21

By American Society of Engineers

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 328 pages. Dimensions: 9.7in. x 7.4in. x 0.7in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 edition. Excerpt: . . . track from the middle line of tank. The hot knife edge melts a kerf in the ice by its own weight, the cutter blade following in the slot to the bottom of the tank. Both sides of a channel are cut simultaneously, the cutters blade hoisted by a chain and hand crank, and the frame then shifted forward for another cut. Two cuts of this cutter are made per ton of ice harvested. The ice cakes are quickly hoisted from the tank by a pneumatic hoist on an overhead track, weighed in the air, and run on track to the elevator in north end of building, and lowered to the ice storage cellar or to the shipping room. Ice is cut up as desired in the shipping room, and supplied by a gravity incline to small push carts, in which it is distributed...
